

Visuals in Teaching – a visual cue

GLP Client: The Prosperity Agenda

Event: “The Tools and Skills for Success: Designing a Learning Program to Strengthen Outcomes” (an event to co-design a learning program)

Example: Use graphics or visual cue to draw attention to a repeated type of activity or information (in this case: a gear with a principle for adult learning)

The Tools and Skills

Select the action that you are most personally drawn to. What tools and skills would best support people to take those actions?

- *What tools already exist that we can build on?*
- *What doesn't exist, but would be simple and powerful if it did?*
- *What skills are needed to effectively use these tools?*
